as a number of them

- ① Identify issues in budget
- ② and repairs

Mr Gino stayed on the trolley that was placed not far from the door and the next thing I noticed was a surgeon that I saw for the first time . He had a long rigid probe of steel in his hand longer than my ruler in my school bag and inserted it in the man. I became confused and not sure what exactly followed, so when I was outside that room and nurse Tom assisting the doctor was on my right I enquired with the Tom , He said that the patient lungs were filled with blood and he died instantly. Mr Gino was dead. I was overcome with a horrible feeling. There was no anesthetist in attendance or an anesthetist nurse just , myself, Tom, Mr Gino and the surgeon Paul McMurdoch. I could not come to term with what I have just witnessed. I was in shock and unsettled.

A NEC ST

Is there a medical negligence? Is it a nursing negligence? Is there a professional negligence? Is there deceit to the administration, to the patient, to relative to the members of the professions? Is there breach of nursing protocols ? Is there breach of medical protocols? Is any law broken? Should I have felt the way I did? Should there be any compensation to the victim if there is any? Is there a victim? Is there any dilemma? Is there any code of conduct
